

City St George's Study Abroad Programme

Autumn 2026

Term dates

Full-time orientation: 30 September/1 October 2026

Teaching begins: 5 October 2026

End of the semester: 18 December 2026

Students studying with us for the full year will take their assessment in the January examination period 11 – 29 January 2027.

Students studying in Autumn 2026 would expect to receive their results and official transcript from late-February 2027.

Modules

Most modules on the Study Abroad Programme are worth 15 credits. This is the equivalent of 7.5 ECTS, and we recommend that it should transfer as 4 US credits. Your home university is ultimately responsible for transferring your credit, and you should check with your home institution what credit they will award for study at City St George's.

A full load of modules is four, worth 60 credits.

A list of modules is below, but full module descriptions are available on our SharePoint. To register for access please complete this short [form](#).

Selecting your modules

When you apply, we ask you to tell us which modules you would like to take so that we can register you for them. It is possible to make changes to your registered modules up until the end of the first week of teaching (i.e. Friday 9 October).

You should make sure you have spoken to your academic and study abroad advisers at your home institution about any academic requirements you have before applying and selecting your modules.

Timetables

Personalised timetables will be available in September. From July outline timetables will be available for you to check whether your chosen modules will complement each other.

General pre-requisites

Most degrees at City St George's are three years long. The module code tells you what level of experience degree students taking that module will have.

Level 1000 modules are introductory level, degree students taking these in Autumn 2026 will be in their first year at university, and most will have recently left secondary/high school. Study Abroad students should not take more than one or two modules at this level.

Level 2000 modules are taken by students with a background in the subject area, for example one or two successfully passed university level courses in the subject area or with transferable skills.

Level 3000 modules are taken by students who have extensive knowledge of the subject area. Degree students will be the equivalent of a US major in the subject and will be graduating in the following summer.

We recommend that students taking a full load of modules at City St George's should take modules mostly in Level 2 and Level 3. Level 1 modules should only be taken if the subject area is new to you.

Our UK and British Culture modules are designed to be taken by students with a variety of academic backgrounds, and we recommend that students only take two of these.

Module/Course descriptions

City St George's expects to offer the following modules in Autumn 2026 for study abroad students. Module descriptions are available on our SharePoint, and our module list is subject to change, we cannot guarantee the running or availability of any of our modules.

Bayes Business School

Accounting and Finance

AF1101 Introductory Financial Accounting

AF2100 Assurance – *pre-requisite: introduction to financial and management accounting*
